

Is your number up?

If we can't find you, we can't help you!

In the event of an emergency, are your house numbers visible to emergency responders?
The easier they can find your home, the quicker they can assist you.

House numbers should be:

- Contrasting or reflective
- **AT LEAST** four inches high – plain block
- Visible up to 150 feet from all angles & at night

Try this test to determine whether or not your home is clearly marked and visible from the street. While driving past your home try locating your house numbers. Repeat this test at night. How long did it take you to find your house number? Emergency personnel experience the same difficulties.

Those extra minutes could save a life!

Marysville Fire District offers reflective house number signs.

Reflective Address Signs:

- Only \$20.00 (one side or two sides)
- Blue background and white numbers
- Measure 6" x 18"
- Available in vertical or horizontal styles

Simply fill out the order form below and return with your payment to:

Marysville Fire District
1094 Cedar Avenue
Marysville, Washington 98270
