If you have one of these...

You need to install gas detection.

- Carbon Dioxide (CO<sub>2</sub>) is a dangerous, colorless, and odorless gas. When it leaks into a room, it displaces oxygen. Fatalities have occurred which is the reason gas detection is required by the fire code.
- Signage is required to be posted near the entry to the room where CO<sub>2</sub> is located. Your installer will know the requirements regarding proper signage.
- A "fire construction permit" is required by the City of Marysville and the system must be inspected by the fire department to ensure it is working properly.
- After installation and acceptance testing, the system shall be maintained per manufacturer guidelines.
- Insurance companies will review inspection documentation following an incident, it is important that your business is up to code. It is the owner's responsibility to ensure compliance.

The list of certified companies above are those that the City of Marysville and Marysville Fire District have on file, and are not inclusive of all companies that may be certified. This list is not intended to recommend companies but to provide guidance to businesses looking for a service provider. The list will be updated as new information is obtained. The City of Marysville and Marysville Fire District make no representation that this information is accurate or up-to-date. You are responsible to verify this information. Companies can call the Marysville Fire District at 360-363-8525, to be considered for addition to this list.
