October 23rd, 2026

Dear Business Owner,

In order to improve the security at your property or place of business, Marysville Fire District is transitioning all fire department lock boxes to the **Knox eLock electronic system**.

Does this apply to me?

- **Further Action Required**: If your building has an older Supra lock box or a Knox Box with a mechanical key, it will need to be upgraded.
- **No Action Required**: If your building already has a Knox Box with an eLock core.

Knox Box with eLock
NO Action Required ✅

I have a Knox Box with a mechanical key, what do I need to order?

Most likely, you will just need to order a Knox eLock core that will allow your current box to be retrofitted.

This applies to all Hinged Door Model 3200 Series Knox Boxes

Check the Serial Number on the nameplate.

- Any Knox Box with a serial number containing six digits beginning with “2”
- Any Knox Box with an eight-digit serial number beginning with “32-”

Note: Even if the eLock core appears to fit, compatibility is not guaranteed. Please verify your serial number before ordering. You can review the Knox Retrofit Fact Sheet for more details.

(*continued on next page*)

I have a Supra Box. What do I need to order?

Unfortunately, Supra Boxes have become obsolete, and keys are no longer made for these. You will need to purchase an approved Knox Box with an eLock system. The 3200 Series is the most common and comparable in size to the Supra Box.

How do I order a Knox eLock system?

- A discount is available for a limited time. To qualify, please fill out the attached order form and follow the instructions provided. The current deadline is **August 31, 2026**.
- *After the discount period has expired*, you may purchase your new eLock box or eLock Core directly from www.knoxbox.com.
- Select **"Start Here to Place an Order"** in the upper left corner of the homepage.
- Confirm that **"Marysville Fire Dist (WA)"** is the registered Knox department.
- Click on **"Shop Products"** on the upper left corner of the screen.
- We recommend selecting a **recessed mount** model for most existing buildings whenever possible for additional security.

When do I have to have this done by?

We ask that you plan to replace or retrofit your existing lock box by **March 31, 2027**. A Knox order form is enclosed to assist with purchasing and includes a **discount available until the specified date**. Please review the information below to determine whether your box requires an upgrade.

What about my Knox Padlocks or Gate Key Switches?

This only applies to Knox and Supra Boxes. No changes are needed for other types of locks or switches.

My order has arrived. What do I do next?

Once you receive your order from Knox, there are a couple of remaining steps left to do.

- If you ordered an **eLock core only,** it will be shipped directly to our administration office. You will be contacted when it is received and again when the retrofit is complete.
- If you ordered a new **3200 Series Knox Box**, you will need to have it securely installed per the installation instructions (*Marysville Fire does not perform this installation*). When ready, please contact the Fire Marshal's Office for opening of the existing lock box and subsequent key placement in the new box using the contact information provided below.

We greatly appreciate your understanding of this needed upgrade. If you have questions or need assistance, our team is happy to help. Thank you for your cooperation and for your continued partnership in keeping our community safe.

Sincerely,

Marysville Fire District - Fire Marshal's Office
